The New Mobility of Our Society Caused by Telecommunications

J. Günther (Danube University Krems, Austria)
Guenther@donau-uni.ac.at

Abstract: People have always been mobile. In the Middle Ages, mass of pilgrimages. Today, these masses are called holiday travellers.

People have never been more mobile than today. Because of increasing the abolishment of many borders in Europe, "freedom" has become a Freedom causes movement. We have yet to overcome the borders of behind the former Iron Curtain.

Our economy needed the division of labour, and therefore more mobil managers.

Moreover, liberalised markets brought about the "global village". In the global economy will be dominated by three key industries:

- Telecommunications
- Information Technology and
- Tourism

Changes in technologies and generations are common developments replaced by new ones. New technologies are replacing old ones. Tele- and Information Technology have propelled us into what we call the In More than 50 percent of employees in developed countries are workin:

The Information Society did not only bring about change. Its instrumen to become more mobile. Mobility is nothing new for people. We can nc lives without being accountable to the state.

Keywords: mobility, telecommunication, Internet, information society, technology
